Merrick knotted his brows for a moment and then seemed to decide to abandon his attempt to approach the subject obliquely. "Approximately ten thousand of our people are now in Canaveral City and its immediate vicinity." Merrick looked straight at Bernard. "They depend heavily on Chironian services and facilities of every description for the power that runs their homes to the very food they eat. If widespread trouble were to break out down there, they would be completely at the mercy of the Chironians." He raised a hand to stifle any objection before Bernard could speak. "Clearly we cannot tolerate such a state of affairs. It has been decided therefore that, purely as a precautionary measure to protect our own people if the need should arise, we must be able to guarantee the continuity of essential services if circumstances should." "Sorry, ma'am," he apologizes.. "We don't get a lot of those," Nanook told them again. "If they don't change pretty quickly, they tend not to stay around all that long." 1 uanita looked from Bernard to Jay. Following a directive from Wellesley, Howard Kalens instructed Amery Farnhill to open an embassy in a small building at Canaveral which the Chironians obligingly agreed to vacate, having been about to move into larger premises elsewhere anyway. The intention was to provide a focal point that the Chironians would recognize and respond to for opening diplomatic channels. Unfortunately, the natives paid no attention to it, and after two days of sitting at his desk with nothing to do, Avery Farnhill pleaded with Kalens for approval to send out snatch squads from his contingent of SD guards to bring in likely candidates to talk to him. Kalens could only partly concur since he was under strict instructions from Wellesley. "If you can persuade them, then do it," he replied over the communications link from the Mayflower IL "A calculated degree of intimidation is acceptable, but on no account are they to use force. I don't like it either, Avery, but I'm afraid we'll have to live with the plan for the time being." "No, I'm not. I'm going to talk about air-conditioning for." "I don't know, Corporal. Recently, I guess." "How old were you then?" Eve asked curiously.. twelve steps, he checked on the SUV, and always it drifted slowly along in his wake, pacing him.. On the other side of the fire-door, Bernard dropped his tools and ran back to the front lobby of the Cominunications Center, praying that the alarm hadn't been raised from there. Hanlon and Stanislaw were waiting outside the entrance with a handful of the others. Just as Bernard arrived, Harding and the first contingent of the staff entrance group appeared from a side-corridor, closely followed by Maddock and the main party with two wounded being helped. Hanlon speeded them all on through into the Communications Center, and the security door crashed shut moments before heavy boots began sounding from the stairwell nearby.. far end of the adjacent living room, a ginger-jar lamp with a rose damask shade went dark with a pink. Sirocco smiled tiredly. "You're excused from taking off your boots," he murmured.. the police.. listen with your heart.. Bernard was surprised and felt a little flattered. "I help look after the main drive systems." "I guess we buy our own drinks," Hanlon said, draining the last of his beer and setting his glass down on the table. "Looks like it," Stanislaw agreed.. Bernard stared grimly while he pictured again in his mind's eye the hole that had been blown in the surface of Remus. "We've got. to stop it," he breathed. "We've got to get a message up there somehow. . . to Stern. . . telling him what he's up against. Thousands of people are still up there." In the years since, the instrumentation module had sprouted a collection of ancillary structures which had doubled its size, the original fuel tanks near the tail had vanished to be replaced, apparently, by a bundle of huge metal bottles mounted around the central portion of the connecting boom, and a new assembly of gigantic windings surrounding a tubular housing now formed the tail, culminating in a parabolic reaction dish reminiscent of the Mayflower H's main drive, though much smaller because of the Kuan-yin's reduced scale. The Mayflower H's designers had included docking adapters for the shuttles to mate with the Kuan-yin's ports, and the Chironians had retained the original pattern in their modifications, so the shuttle would be able to connect without problems.. "What do you think of that theory, Mrs. D?" Leilani asked with little of her usual humor, but with a quiet
