And today, your time to acquire this guide since on the list of compromises has become ready. "Those who lead, lead," he said, simply. "Til follow you as long as you keep leading," did children say "pee-pee" and "poo-poo," and then giggle? You have read scholarly books about taboos. "Oh, of course. Minor poets do nothing else. They positively swarm. I'd rather be major and lonely, thank you very much." In the Hall of the Martian Kings by John Varley. Her expression mercurially alters to sadness. "You're scissors, Robbie. All shiny cold metal. How. That, I think, would be a waste of time. We are not necessarily going to breed thousands of... like a mail slot, and slid the moth inside." "Sure. Can you?" I will? when the authors keep politics out of their stories. But they never do; in fact, it seems absolutely impossible to write anything without immediately making all sorts of assumptions about what human nature is, what good and bad behavior consists of, what men ought to be, what women ought to be, which states of mind and character are valuable, which are the opposite, and so on. Once fiction gets beyond the level of minimal technical competence, a reviewer must address these judgments of value. Generally, readers don't notice the presence of familiar value judgments in stories, but do notice (and object to) unfamiliar ones as "political." Hence arises the insistence (in itself a very vehement, political judgment) that art and politics have nothing to do with one another, that artists ought to be "above" politics, and that a critic making political comments about fiction is importing something foreign into an essentially neutral area. But if "politics" means the relations of power that obtain between groups of people, and the way these are concretely embodied in personal relations, social institutions, and received ideas (among which is the idea that art ought not to be political), then such neutrality simply doesn't exist. Fiction which isn't openly polemical or didactic is nonetheless chock-full of politics. If beauty in fiction bears any relation to truth (as Matthew Arnold thought), then the human (including social and political) truth of a piece of fiction matters, for aesthetic reasons. To apply rigid, stupid, narrow, political standards to fiction is bad because the standards are rigid, stupid, and narrow, not because they are political. For an example of (to my mind) profound, searching, brilliant, political criticism, see Jean-Paul Sartre's *Saint Genet*. Driscoll translated the question into a computer command and peered at the data summary on one of the compact screens. "Insignificant seismic above threshold at eight hundred yards. Downwind ratio less than five points up at four hundred. Negative corroboration from acoustics-background swamping." The computers were unable to identify vibration patterns correlating with human activity in the data coming in from the sensing devices quietly scattered around the gorge by low-flying, remote piloted "bees" on and off throughout the night; the chemical sensors located to the leeward of the suspected decoys were detecting little of the odor molecules characteristic of human bodies; the microphones had yielded nothing in the way of coherent sound patterns, but this was doubtless because of the white-noise background being generated in the vicinity of the stream. Although the evidence was only partial and negative at that, it supported Swiley's assertion that the main road down to the objective was, incredibly, virtually undefended for the time being... nate from fiction these idiosyncratic qualities other readers find valuable, art being of an order of complexity nearer to that of human beings (high) than that of facial tissues (low)... too." She clutched her hands together, lacing and unlacing the fingers.
